About Above & Beyond

Since 2010, Above & Beyond has become a leading manufacturer of high-quality tents, sails and shade solutions, manufacturing 5,000 products annually. With our own manufacturing unit based in Belgium, we take pride in controlling every step of the production process. Our dedicated team of +30 experts, including sail specialists and an innovative R&D team, ensures that every product we deliver is crafted with precision and care.

With additional capabilities in wood and aluminium machining, we've expanded our expertise to offer a broader range of solutions.

Our commitment to quality is present through both the materials we use and the service we deliver. We believe in building lasting relationships with our clients by offering personalized guidance and support throughout the buying process.

Inhouse production & R&D

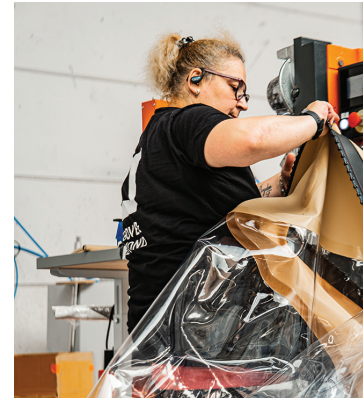

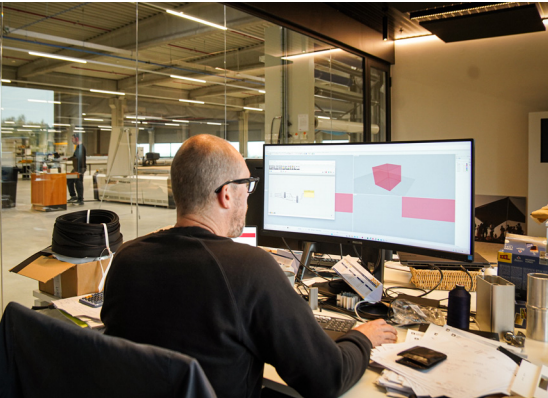

Our commitment to craftsmanship and innovation is at the heart of our manufacturing. Our advanced production department is equipped with state-of-the-art machinery and a team of experienced professionals, enabling us to produce high-quality tents, shelters, shade cloths and other outdoor structures.

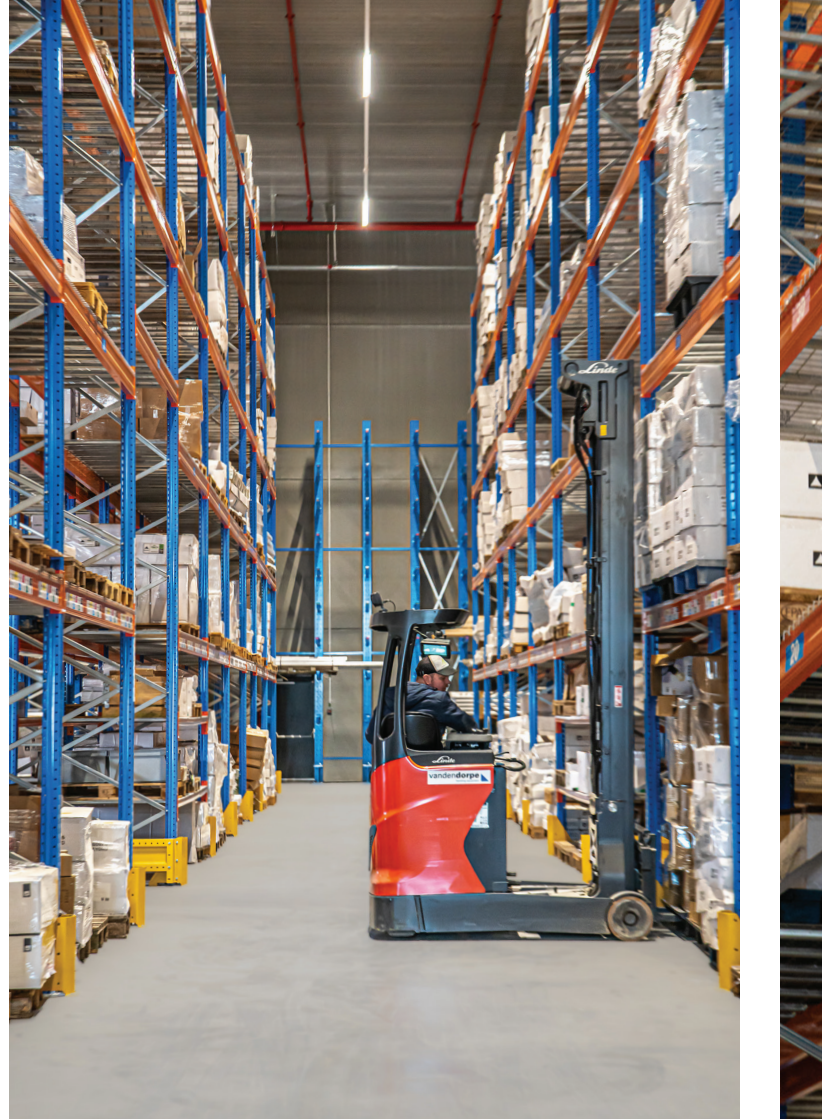

In our pursuit of excellence, we combine various production facets to deliver distinctive products. Our cloth and sail production department, equipped with multiple advanced welding machines, creates durable and weather-resistant tent cloths that can withstand the most demanding conditions.

Our focus on quality is also present in the metal and woodworking processes. Our skilled employees provide sturdy metal frames and wooden structures that form the basis for our various outdoor products.

A dedicated team of stitchers ensures strong seams, while our aluminium machining area produces high-quality aluminium components for strength and stability.

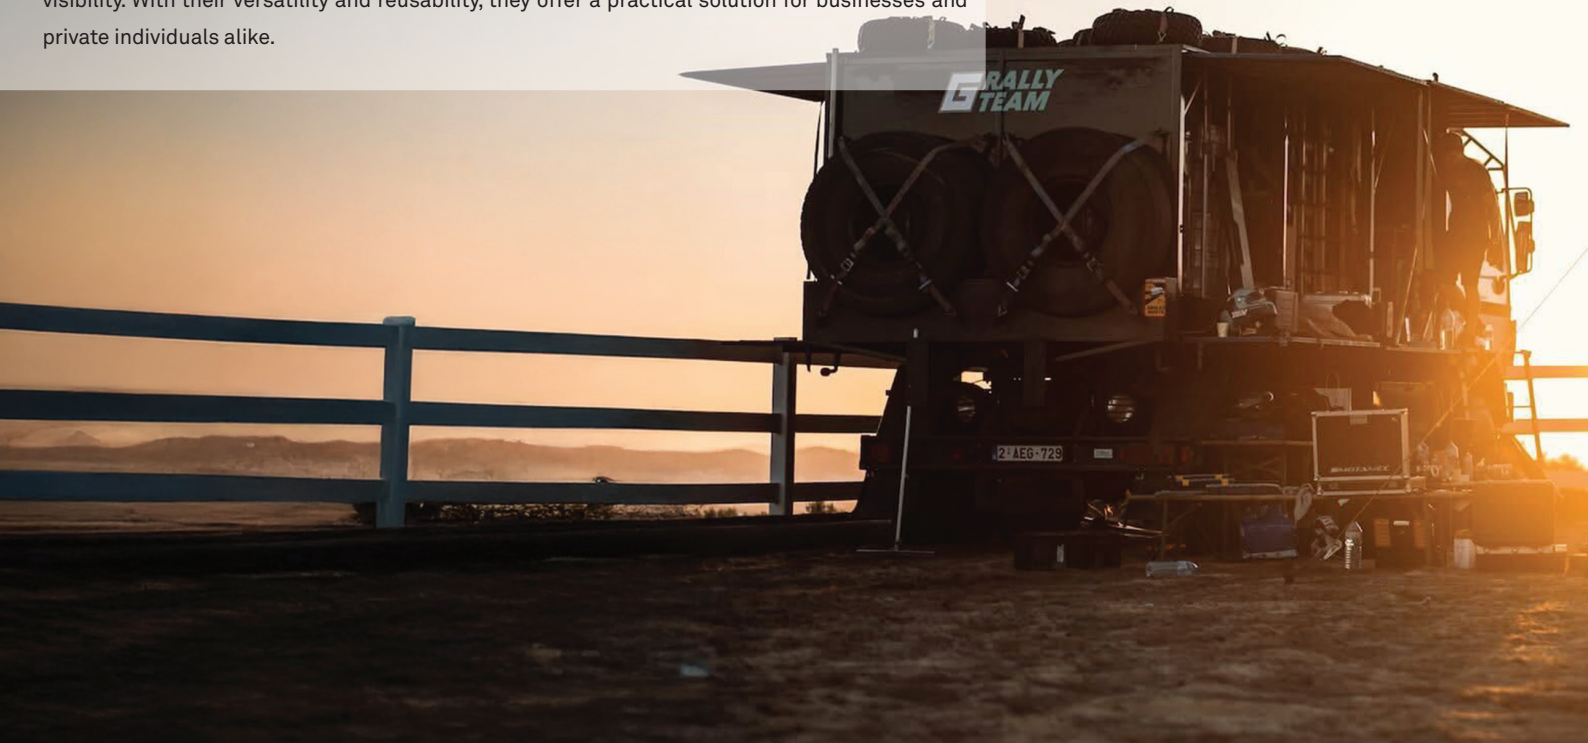

Warehouse

The warehouse at Above & Beyond is a modern, high-capacity facility designed for efficiency and scalability. With space to store approximately 5,000 pallets, it's perfectly suited for handling large volumes of goods with ease. The warehouse features four fully equipped loading docks, allowing for fast and streamlined loading and unloading operations. Combined with a well-organized layout and a highly efficient workflow, we ensure quick turnaround times and reliable handling of inventory.

Folding tent

Folding tents are lightweight, portable and easy to set up in just a few minutes, making them perfect for a wide range of outdoor events. The sturdy frames and weather-resistant materials ensure durability, while custom printing options enable effective branding and promotion. They are ideal for markets, sporting events, trade fairs and gatherings, providing both shelter and visibility. With their versatility and reusability, they offer a practical solution for businesses and private individuals alike.

AluLite

The AluLite folding tent is a lightweight yet sturdy solution, ideal for those who need to set up quickly and easily. With its 1.5 mm aluminium frame, this tent is highly portable and perfect for semi-professional use, events or personal occasions. Despite the lighter frame, the AluLite does not compromise on durability, providing a reliable and stable structure in various conditions. Thanks to its ease of transport and assembly, it is the perfect choice for anyone looking for a convenient, high-quality tent.

AluForce

The AluForce folding tent is built for strength and durability. With a robust 2.5 mm aluminium frame, it is designed for more frequent and professional use and offers greater stability, even in demanding conditions. The AluForce is perfect for those who need a long-lasting tent for use in tougher conditions. The tent withstands regular assembly and disassembly. The professional construction ensures top performance, making it the first choice for users seeking the best in durability and reliability.

Roof

The polyester or PVC used for our folding tent roofs is wind- and waterproof, with velcro fixings that ensure a fast, easy and secure fit. Both fabrics are mould-resistant, block UV rays and are flame retardant for added safety. In addition, PVC protective caps are mounted on the corners to protect them from damage caused by abrasion. Both polyester and PVC can be fully printed, offering personalisation options for a wide variety of tent designs.

Frame

Our high-quality aluminium frames provide stability and durability, ensuring the tent can withstand a variety of weather conditions. We exclusively choose aluminium given its significant advantages over materials such as steel.

Aluminium is lightweight and naturally does not rust due to the oxidation process. The frame has a direct impact on the lifespan of the tent. A robust aluminium frame minimises wear during assembly, disassembly and transport, reducing the chance of damage over time.

Investing in an AluLite or AluForce tent therefore not only provides reliability, but also cost efficiency, as the tent will require fewer repairs and replacements in the long run.

Sidewalls

Our folding tents can be fitted with various sidewalls to fully enclose the structure. You can choose from closed sidewalls for maximum privacy, sidewalls with doors for easy access, sidewalls with windows for natural light, and panoramic sidewalls for an open, spacious feel while still providing protection. Each type of sidewall increases the tent's versatility and offers tailored solutions for different needs depending on the occasion. The flexibility of these options makes the tents ideal for a wide range of events, ensuring comfort and convenience in any environment.

The sidewalls are attached to the roof and to each other with sturdy velcro, making the tent fully windproof. Velcro has the added advantage of continuing to perform reliably in the most challenging conditions and with intensive use.

Printing

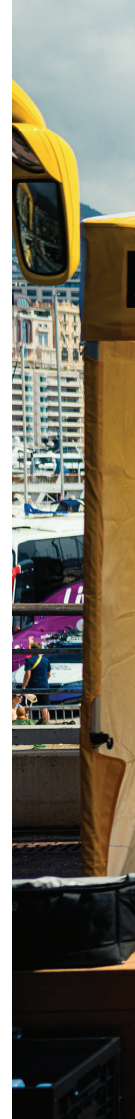

Roofs and sidewalls of folding tents in both polyester and PVC can be fully customised with high-quality printing. You have the option to print on white or black fabric, depending on your design preferences. By supplying your own design, you can create a striking tent that stands out at any event. In addition, a complete range of promotional materials is available to complement and extend your printed folding tent, maximising visual impact and promotional effectiveness.

Anchoring

Proper anchoring of folding tents is essential for safety and stability, especially in windy conditions. Commonly used anchoring options include galvanised or plastic weights, straps with ground pegs, sand or water bags, and concrete blocks. Each method offers different levels of safety depending on the surface: pegs work well on soft ground, while weights are ideal for hard surfaces such as asphalt or concrete. Secure anchoring prevents the tent from shifting, collapsing or blowing away, keeping the risk of injury or damage to a minimum. Choosing the right anchoring method based on location and weather conditions is crucial for safe and reliable use.

ABOVE & BEYOND

Transport

Safe and efficient transport of folding tents is crucial to extending their lifespan and ensuring they arrive in perfect condition at every location. We therefore offer wheeled carry bags for easy handling, protective covers against dirt and moisture, and durable flight cases for maximum protection during transport. Proper storage and transport help prevent damage to the frame, tears in the fabric and unnecessary wear. Investing in quality transport solutions not only protects your equipment, but also saves time, reduces repair and replacement costs, and ensures your tent is always ready for professional use.
