About Above & Beyond

Since 2010, Above & Beyond has become a **leading manufacturer of high-quality tents, sails and shade solutions**, manufacturing 5,000 tents annually. With our **own production unit** based in Belgium, we take pride in controlling every step of the production process. Our dedicated team of +30 experts, including sail specialists and an innovative R&D team ensures that every product we deliver is crafted with precision and care.

With additional capabilities in **wood and aluminum machining**, we've expanded our expertise to offer a broader range of solutions.

Our commitment to quality is evident in both the materials we use and the service we deliver. We believe in building lasting relationships with our clients by offering personalized guidance and support throughout the buying process.

Inhouse production

Our commitment to craftsmanship and innovation is at the heart of our manufacturing. Our advanced production department is equipped with state-of-the-art machinery and a team of experienced professionals, enabling us to produce high-quality tents, shelters, shade cloths and other outdoor structures.

In our pursuit of excellence, we combine various production facets to deliver distinctive products. Our tarpaulin production department, equipped with several advanced welding machines, creates durable and weather-resistant tent cloths that can withstand the most demanding conditions.

Our focus on quality is also evident in the metal and woodworking processes. Our skilled employees provide sturdy metal frames and wooden structures that form the basis for our various outdoor products.

A dedicated team of stitchers ensures strong seams, while our aluminium machining area produces high-quality aluminium components for strength and stability.

Warehouse

The warehouse at Above & Beyond is a modern, high-capacity facility designed for efficiency and scalability. With space to store approximately 5,000 pallets, it's perfectly suited for handling large volumes of goods with ease. The warehouse features four fully equipped loading docks, allowing for fast and streamlined loading and unloading operations. Combined with a well-organized layout and a highly efficient workflow, we ensure quick turnaround times and reliable handling of inventory.

An aerial photograph showing a light-colored dirt road or path that curves diagonally across the frame. The road is flanked by dense green vegetation, including bushes and trees. The overall scene is a natural, outdoor setting.

Easy-up stretchtent

The Easyflexx stretch tent instantly transforms any outdoor gathering into a cozy, atmospheric event. Its compact design makes it perfect for a wide range of uses, whether it's a small family get-together or a larger celebration. Crafted for ease of use, this tent can be set up effortlessly by one or two people in just 30 minutes. It brings a touch of southern charm to any occasion without compromising on practicality or simplicity.

Fabric

The exterior of the woven elastic stretch material used to manufacture the Easyflexx tents has a watertight PVC coating. The tent is treated to withstand UV rays and can resist wind speeds of 5 to 6 on the Beaufort scale. An Easyflexx stretch tent is fire-retardant and resistant to mildew formation. They are available in three colours: Desert Sand (beige), Urban Nights (taupe) and Crocodile Camo (khaki green) and just as many sizes. A rather small group of people will fit perfectly underneath the 4,2 x 4,2 m tent, while bigger gatherings can take place using a 6,35 x 6,35 or even 8,5 x 8,5 m tent. All of the accessories for installation on soft ground are included with the tent cloth.

Aluminium poles

The aluminium poles can be joined together easily to create the desired length to enable the tent to be assembled quickly and conveniently. The poles are 40 mm in diameter, with a wall thickness of 2 mm and are available in two colours: Silver Smoke (silver grey) and Olive Grove (olive green). Thanks to the pole set's modular construction and the handy strong carry bag, it is a very compact package, making it easy to transport in any car and even by bike.

Wooden poles

Wooden poles are prized for their aesthetic appeal, adding a natural, rustic charm that complements outdoor settings. Their sturdy construction provides reliable support, and they have the added benefit of serving as a support for music or lighting installations. Wood is often chosen for its sustainability, as many wooden poles are sourced from renewable materials.

Choose the set-up

You have the flexibility to choose from three unique installation methods for the same tent: Sunny Side Up, Crooked Corners, or Polar Peak. Each setup offers a different aesthetic, allowing you to customize the tent's appearance to match your style or the event's theme. Whether you prefer a clean, classic look or something more unconventional, simply pick the setup that appeals to you the most and enjoy a tent that not only provides shelter but also adds a touch of personalization to your outdoor space.

Anchoring

Proper anchoring of Easyflexx tents is essential to ensure safety and stability, especially in challenging or uneven conditions. The most common anchoring option includes pegs, which are mainly used for soft soil. Alternatively concrete blocks can be a great solution for anchoring on hard soil, varying in weight and size depending on the circumstances and size of the tent. Secure anchoring prevents the tent from shifting, collapsing, or blowing away, reducing the risk of injury or damage. Choosing the right anchoring method based on location and weather is crucial for safe and reliable use.

Transportation

Safe and efficient transportation of Easyflexx tents plays a key role in protecting the materials and keeping them in top condition for every setup. Both the tent canvas as well as the aluminium poles and the accessories are packed in sturdy PVC bags, allowing you to easily store the tent and take it with you wherever and whenever you'd like. The bags shield the tent and its parts from dirt, moisture, and damage during handling and transit. Proper storage and transport not only extend the life of the tent but also help avoid costly repairs, reduce setup delays, and keep your equipment looking professional and event-ready at all times.

ABOVE & BEYOND

One man job

The Easyflexx tent is designed for effortless installation, making it possible for even one person to set it up with ease. Thanks to its intuitive design, the lightweight fabric and the aluminum poles of convenient lengths, you can quickly assemble the tent without the need for extra hands or complex tools. Whether you're setting up for an event or a weekend getaway, the Easyflexx tent streamlines the process, allowing you to enjoy more time under its reliable shelter.

FRAME CHARACTERISTICS	Aluminium	Wood
Frame material	Aluminium	Eucalyptus
Wall thickness	2 mm	×
